B) Making an effort to use those resources and avoid polystyrene ones can help to decrease ~~your~~ the environmental impact.

C) Non-biodegradable ^{Def} essentially means that any polystyrene that makes its way into a landfill will stay there indefinitely, never breaking down and returning to the earth.

D) Polystyrene, as a product, is very convenient to use, but it has some important effects we should consider when making choices as consumers

E) While recycling polystyrene material can cushion the environmental blow of its use, alternatives are available that are created from renewable resources and biodegrade more readily.

F) For example, while polystyrene has some excellent uses and is technically recyclable, it is not a substance that biodegrades.
