PERCENTAGE

QUESTION: In an examination 34% of the students failed in Maths and 42% failed in English. If 20% of the student failed in both the subject. Then the percent of student who passed in both the subject?

SOLUTION:

$$\begin{aligned}\text{Percentage of students who passed in both subject} &= 100 - (14 + 20 + 22) \\ &= 56 \%\end{aligned}$$
