

- (A) In such an environment, the use of performance-enhancing drugs has become increasingly common.
- (B) Most serious athletes will tell you that the competitive drive to win can be fierce.
- (C) But using performance-enhancing drugs aka, doping isn't without risks.
- (D) You may decide that the benefits aren't worth the risks.
- (E) Take the time to learn about the potential benefits, the health risks and the many unknowns such as human growth hormone, erythropoietin, diuretics, and stimulants.
- (F) Besides the satisfaction of personal accomplishment, athletes often pursue dreams of winning a medal for their country or securing a spot on a professional team.

Answer- **BFACED**

- (A) Given that TB mainly spreads through air, no amount of sensitising the public about the evils of spitting seems to work.
- (B) It needs to be clarified by experts whether these practices are hygienic as there are millions of fans who emulate their heroes.
- (C) It is petrifying to know that the incidence of tuberculosis infection is one of the highest in India and TB-related mortality —
- (D) Which is one of the major causes of deaths in the country — is also among the world's highest.
- (E) Strangely, the developed world seems to have different standards of spitting, as one can notice even elite cricketers spitting often on the very field they play on.
- (F) Swachh Bharat may clear the land surfaces of garbage and other waste but nothing seems to halt the ubiquitous Indian habit of spitting in its tracks.

Answer- **CDAFEB**
