- Q.1. Multiple choice examination answer sheets can be evaluated automatically by?
1. Optical Character Reader
  2. Optical Mark Reader
  3. Magnetic tape reader
  4. Magnetic ink character reader
  5. None of these
- Ans: 2
- Q.2. A set of flip flops integrated together is called \_\_\_\_?
1. Counter
  2. Adder
  3. Register
  4. Flip flop
  5. All of the above
- Ans: 3
- Q.3. Which of the following is used for close a tab on a browser?
1. Ctrl + T
  2. Ctrl + W
  3. Ctrl + A
  4. Ctrl + Y
  5. None of these
- Ans: 2
- Q.4. The first electronic computer was developed by?
1. J.V. Attansoff
  2. Bill Gates
  3. Seymour Cray
  4. Vinton Cerf
  5. Charles Babbage
- Ans: 1
- Q.5. The ALU of a computer responds to the commands coming from?
1. Primary memory
  2. Control section
  3. External memory
  4. Cache memory
  5. None
- Ans: 2
- Q.6. A computer checks the \_\_\_\_ of user names and passwords for a match before granting access?
1. Website
  2. Network
  3. Backup file
  4. Database
  5. None of these
- Ans: 4
- Q.7. What is the name given to the molecular-scale computer?
1. Minicomputer
  2. Nano computer
  3. Supercomputer
  4. Microcomputer
  5. None of the above
- Ans: 2
- Q.8. The primary memory of a personal computer consists of?
1. ROM only
  2. RAM only
  3. Both ROM and RAM
  4. Memory module
  5. None of the above
- Ans: 3
- Q.9. Press \_\_\_\_ to move the insertion point to the Address box, or to highlight the URL in the Address box?
1. ALT + D
  2. ALT + A
  3. SHIFT + TAB
  4. TAB + CTRL
  5. CTRL + S
- Ans: 1

Q.10. A (n) \_\_\_\_\_ appearing on a web page opens another document when clicked?

1. Anchor                      2. URL                      3. Hyperlink  
4. Reference                      5. None of these

Ans: 3

Q.11. Which of the following refers to the rectangular area for displaying information and running programs?

1. Desktop                      2. Dialog box                      3. Menu  
4. Window                      5. None of these

Ans: 1

Q.12. Is the layer of a computer system between the hardware and the user program?

1. Operating environment    2. Operating system  
3. System environment    4. Utility software  
5. Spooler

Ans: 2

Q.13. The symbols used in an assembly language are?

1. Codes                      2. Mnemonics                      3. Assembler  
4. All of the above                      5. None of the above

Ans: 2

Q.14. The list of coded instructions is called?

1. Computer program    2. Algorithm  
3. Flowchart                      4. Utility programs  
5. None of the above

Ans: 1

Q.15. What is the name of the computer terminal which gives paper printout?

1. Display screen                      2. Soft copy terminal  
3. Hard copy terminal                      4. Plotter  
5. None of the above

Ans: 3

Q.16. The original ASCII code used \_\_\_\_\_ bits of each byte, reserving that last bit for error checking?

1. 5                      2. 6                      3. 7  
4. 8                      5. 10

Ans: 3

Q.17. Which Company is the biggest player in the microprocessor industry?

1. Motorola                      2. IBM                      3. Intel  
4. AMD                      5. All of these

Ans: 3

Q.18. A high quality CAD system uses the following for printing drawing and graphs?

1. Dot matrix printer    2. Digital plotter  
3. Line printer                      4. Scanner  
5. All of the above

Ans: 2

Q.19. Symbolic logic was discovered by \_\_\_\_\_?

1. George Boole                      2. Herman Hollerith  
3. Vonn Neumann                      4. Basic Pascal  
5. Sun Microsystem

Ans: 1

Q.20. Main circuit board in a computer?

1. Decoder                      2. Highlight                      3. Select  
4. Mother board                      5. Bus

Ans: 4
